**LinkedIn:** <https://www.linkedin.com/in/connie-h-hong>

### SUMMARY

Software Developer with a background in Music Education, industrial sewing, and the Arts. Personally committed to sustainable and minimal waste living; I am looking for a supportive team where I can collaborate through creativity, curiosity, attention to detail, strong work ethic, and authentic engagement.

### EXPERIENCE

**Software Developer Lead**  
**Loveland, CO**

**Radial Development Group**  
**September 2021-present**

- Utilized various frontend and backend technologies for over a dozen projects in client web and software solutions
- Facilitated meetings between clients and developers to improve architectural foundations in agile practices
- Implemented testing, PR reviews, and production releases on Github and Heroku
- Contributed to writing production code for greenfield and legacy codebases, incorporating new features and bug fixes

**Front End Engineering Student**  
**Denver, CO**

**Turing School of Software and Design**  
**June 2020-April 2021**

- Participated in Student Leadership Committee to foster growth and connection among cohort peers
- 1700+ hours of coursework in fundamental technologies, modern languages, and frameworks for web development
- Volunteered as a tutor for an incoming student for 1-to-1 pairing opportunities
- Collaborated on 12 remote group and pair projects, in addition to over 10 solo projects in Vanilla JavaScript and React, to display knowledge and learn aspects of software development

### PROJECTS

**Facelt** <https://github.com/conconartist/face-it> <https://face-it-blue.vercel.app/>

- A responsive PWA that allows a user to choose beauty products categorized as vegan, fair trade, cruelty free, organic, and zero waste utilizing RESTful API requests, React, JS, CSS, and Cypress for testing
- Built over 6 days as a group project of 3
- Additionally implemented a backend server in Node.JS with Express and MySQL, including customized categories to expand the site for future iterations

**Lyric Lava** <https://github.com/conconartist/lyric-lava> <https://lyric-lava.vercel.app/>

- Web app for niche audience of songwriters with writer's block, utilizing the Words API to generate random prompts, rhymes, and thesaurus
- Implements React, ES6 JavaScript, CSS, HTML, Cypress
- Built over 4 days as a solo project
